

Bring and Buy instructions

Register an account at <https://dragonmeet.muckypupcreations.com/>

Once registered, you will be able to add the games you are looking to sell by going to the shop tab and selecting "Sell a Game"

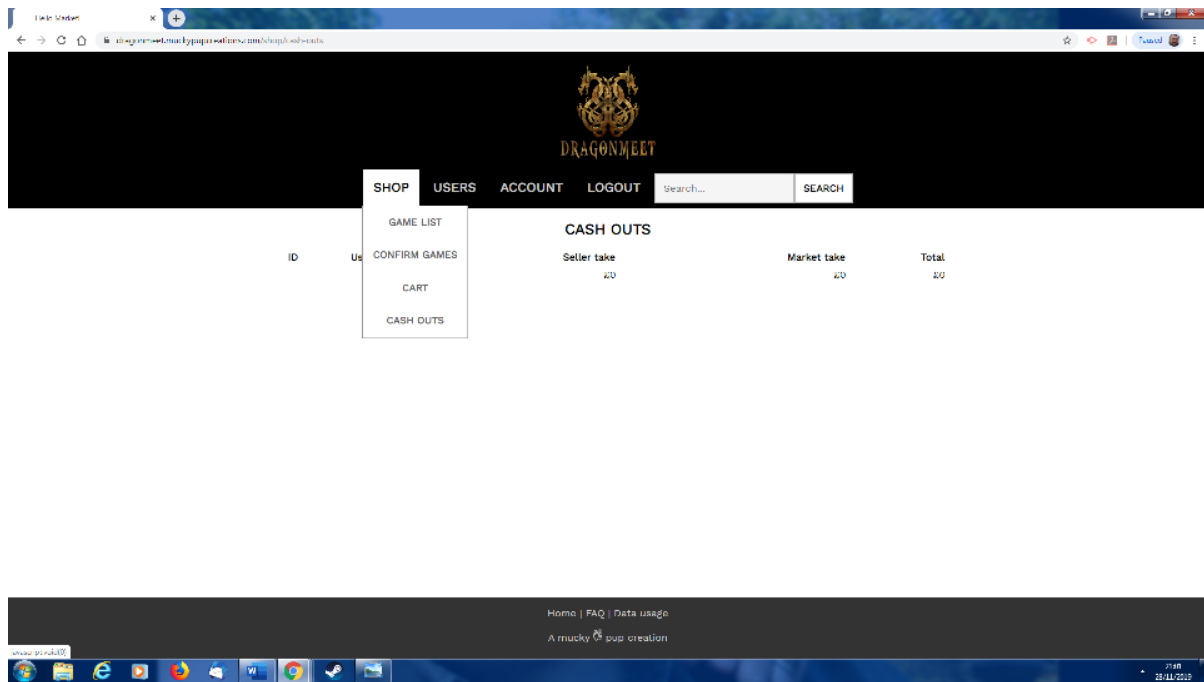

This then moves you to the screen that lets you type in the name of the game, the database primarily works from Board Game Geek, so if the game you're selling is not on there, just type in the name manually and click Submit.

Once you have submitted all your games, you can come to the bring and buy desk and we will print out labels for all your games and place them in the bring and buy.

At any point in the day, you can check on what has sold and what hasn't using the inbuilt functions that show what you have sold and what you haven't. When you come to collect your money and your remaining games, the website will show you what you are owed and what you have outstanding.

When buying a game, just take it to one of the team on the bring and buy and they will scan the code and ensure that the correct account is credited. While it is possible to cash out at any time, we are requesting that people only cash out when collecting their remaining games to minimise the level of administration that we have to do at the convention.
